- Architected and coded the JavaScript snippet **Convertext** which detects content nodes on publisher's web sites. (Sep - Nov 2014)

#6 ВИНЕГРЕТ

WORK EXPERIENCE

Jun 2007 - ...

FSUE "Rosmorport" (Russian Federation) - system administrator
Category: Information Technology / E-commerce
Job Description & Achievements: Professional experience: • Administering geographically distributed enterprise network infrastructure consisting of headquarter office with summary amount of approximately 60 PC's and 2 branches from 40 to 50 employees each. • Configuring routers, switches, ASA firewalls, VoIP gateways, telepresence terminals, WiFi controller and access points. • Creating, maintaining and enhancing network documentation and technical schemes, managing IP address plan. • Monitoring, troubleshooting, testing performance and QoS, providing fault tolerance and high availability of network applications and services. Project highlights: • Linked 3 distributed sites for data and voice connections using ISDN and VPN by configuring Cisco routers ISR 3845/2821 (Cisco Call Manager Express and local PBX) with QoS; • Provided fault tolerant connectivity between main office and remote branches by implementing dual cloud DMVPN topology (with 2 hub routers and 2 ISPs in main office, 2 ISPs in the branches) • Implemented secure authentication of client devices plugged in LAN ports by configuring 802.1x authentication on 24 access switches with use of Microsoft NAP server. • Planned, developed and installed enterprise backup system using Bacula and Cobian; • Configured collecting statistics of SLA and link speed usage, notifying and sending alerts by deploying Zabbix monitoring system; • Implemented and deployed Cisco Call Manager 10 cluster with Contact Center, voice mail, call recording and input queues for offices operation; • Performed transfer of Lotus Domino to Microsoft Exchange 2010 mail system; • Developed billing software for customers based on NetFlow aggregation and PostgreSQL/MSSQL with web interface;

Employment

bryukh.com

Valentin Bryukhanov aka Bryukh

Web Developer and Game/Puzzle Designer

CONTACT ME

About Me

I'm a software and web developer.

My main expertise is in Python and JavaScript, but I'm open for new languages and technologies and expanding my knowledge stack. I'm using various frameworks, libraries and technologies and trying to choose the best ones for a project (or new for pet-projects). Programming is not only a job for me but also a hobby.

I also have experience in Puzzle and Game design, especially in coding puzzles and games. All my projects are located at Github and I actively use it for my work and open source contributions. My free time I spend at competition sites for developers with interesting technical and algorithmic problems.

Belgorod, Russia
